This mission now enters its fifth year and continues to demonstrate its importance, even during the global pandemic that continued throughout 2021.

The mission's objective is to contribute to the migrants' and asylum seekers' protection in Mexico by improving their access to essential information while they travel the route from Central to North America, building a bridge between migrants and other relevant organisations producing information materials.

A large majority of migrants travel without a telephone and many use television as their primary source of information in their home countries. They arrive in a new country with limited to no information about their rights, safety measures, and administrative procedures.

In this context, the diffusion of relevant, reliable information in key locations along the migratory route is essential to meet the needs of migrants and contribute to their protection.

KEY FIGURES AND RESULTS

Users reached in the highest months when shelters are fully operational, the scope of the system is very important.

New information For 80.65% of the migrants the information on the screens was new to them.

Took action to increase their safety Actions include apply for a humanitarian visa, request medical or psychological tips and change route or way of traveling.

Felt more safe 54% of the people who saw the information on the screen felt safer.

Migrants reading the screens In 2021, 62% of the migrants passing through shelters read the content on the screens.

Positive Impact 98.25% of the migrants said that it had a positive impact in their lives.

\[ \begin{align*}
\text{2017} & : 35 \\
\text{2018} & : 44 \\
\text{2019} & : 30 \\
\text{2020} & : +15 \\
\text{2021} & : +49
\end{align*} \]

There are currently 44 TSF screens in shelters across the migrant route.

Of these screens were added during the year 2021.

The growth experienced during 2021 was greatly influenced by the collaboration with non-governmental organizations like IOM, Help.org, and shelters.

Of these new screens belong to the IOM collaboration; They are mainly on the northern border of Mexico with the US.

The remaining screens have become part of the Help.org collaboration, which has facilitated the installation of screens not only in Mexico but also in Guatemala and Colombia.

FOR 2022 A total of 64 new screens will be added to the system;
